

FINAL RETROSPECTIVE ARTEFACT

After retrospectively analysing and evaluating the entire **Business Analyst** internship and my learning journey at **DataDisca Pty. Ltd.** over the past 6 months or so, I am really glad about the progress I have made, and the invaluable experience gained in the domain of **Business & Data Analysis** under the aegis of **Thilak Fernando** (*Managing Director & Chief Data Scientist* at DataDisca). During this period, I have honed my core business analysis skills by undertaking various imperative tasks and activities like **Requirements Gathering & Elicitation, Workflow Mapping, Documenting & Reporting, Problem Solving, Strategic Analysis** to name a few. Moreover, I have also enhanced my data analysis skills by incorporating several fundamental elements of data analysis into my internship deeds, for instance, **Data Exploration & Data Cleaning (ETL), Data Visualization** (via interactive & engaging *Dashboards, BI Reports*), etc.

I have been fortunate enough to work on a multitude of *in-demand* software tools & technologies during this immersive learning juncture ranging from **Tableau & Power BI** to **MS Office Suite (Word & Excel) & PyCharm (Python)**. Furthermore, I have also attained *hands-on* experience and exposure to other highly sought-after software applications & technologies as well like **GitHub** and **Zoho (CRM)**. I shall now strive to continue this quest by knowing and growing more in these domains whilst acquainting myself with other *new & emerging* technologies as well, keeping pace with the ever-evolving with of IT.

So, I would hereby like to express my gratitude towards Thilak & Co who have assisted me in this endeavour by providing me with all the necessary *resources* and *guidance* required for substantial **career growth & development** in the desired field(s). I would like to thank them for imparting their *intellect & wisdom* whilst interacting regularly with me about my progress and sharing their valuable *opinions & feedback* along the way. It all simply wouldn't have been such enriching without them!

Therefore, to wrap it up in a nutshell, there is a famous old saying that goes on like this, "*Every ending has a new beginning!*" So, now that this chapter of my life is drawing to a close, there are many more new chapters available here onwards for me to *indulge* (into), *write*, *explore*, and *revel!*
